ABOUT ME

I have basic knowledge of building and developing a software project through projects at school. I am honest, trustworthy and responsible. I always want to learn new things and try to do my best at work. I look forward to contributing my experience and working knowledge to develop the project

EDUCATION

2020 - Present
DUY TAN UNIVERSITY
SOFTWARE TECHNOLOGY
GPA : 3,26

TECHNICAL SKILLS

Selenium , Postman
C# , .NET
SQL Server
HTML , CSS , Bootstrap

PROJECT

Hotel Managerment

08/2023 - 10/2023
Team size 3
https://github.com/Zanh1852/Hotel_Management

DESCRIPTION

- Choose technology and build architecture with Vuejs Framerwork(SPA), Bootstrap, Javascript, HTML, CSS, C#
- The project uses **APIs** to communicate the backend with frontend
- Applying the **Scrum model** ensures the project stays on schedule and completes project requirements
- Database design and processing with **SQL Server**

MY RESPONSIBILITIES

- Use scrum model, learn business, write project plan report
- Write testcase for testing based on product backlog document
- Perform testing and reporting to developer
- Use **postman** to perform API testing
- Test and ensure the software works according to set goals
- Design database using **SQL Server** with project team
- Conceptualize and design interfaces using **HTML, CSS, Bootstrap** with the project team

WEBSITE SELLING PET

02/2023 - 04/2023

Team size 5

<https://github.com/Zanh1852/WebsiteSellingPet>

DESCRIPTION

- Apply knowledge of **MVC model** for project management and ease of maintenance
- Use **Bootstrap , HTML , CSS** to implement the interface
- Use C# to process logic and data for the software
- Design and build Database with **SQL Server**

MY RESPONSIBILITIES

- Write SRS documents and test cases
- Test in the Fontend section such as ordering, payment,...
- Test in the Backend section such as testing login, adding new products, product categories,...
- Solve problems and barriers in the development process, help the team overcome difficulties
- Build management and user interfaces using HTML, Css, Bootstrap with the project team
- Tester and ensure the software works according to the set goals

LIBRARY MANAGERMENT

10/2022 - 11/2022

Team size 5

https://github.com/Zanh1852/Libary_Management

DESCRIPTION

- Use Winform on Visual studio software to design drag and drop interface
- Build the app with C# language using the ADO.Net library to connect to the database and display data
- Database design and processing with SQL Server
- Applying the 3-layer model to the project makes debugging and management easier

MY RESPONSIBILITIES

- Learn about project requirements and write requirements specification documents
- Write test cases and perform testing of functions such as book borrowing management, book information management, reader management,...
- Participate in interface design using ADO.NET library
- Building data processing backend code using C#
- Design and build databases with SQL Server
